PREFACE

Good afternoon. This is my first Harry Potter book. Or would it be more accurate to call it a Sirius book? I first started thinking of putting out this book while reading the 20th chapter of the 3rd book, so the story ended up being like this.

Known as "Shota" by my friends and acquaintance, I was surprised to find out I would be into a character who is probably over 30, surprises even me. fufufu Now I'm giving up the infamy of being a "shota" (laugh), I'm giving it up, okay?. This is something that has been bothering me since I saw the movie-how old is Harry's father? Considering the time when Harry was a baby, he seemed to be pretty old, but 12 years later, he must have been a good age . . . when I came back to my senses and thought about it. Estimating a bit, James got married as a student, and if they had Harry right after graduating, then that's 11 plus 13 years which means he was in his early thirties!! That was the dream I was had about it. If you think about it, the fact that he left such a fortune for Harry means that he must have been working very hard. (It's not that the Potter family was very wealthy . . . was it?) Similarly, Sirius seems to inexplicably have hundreds of Galleons, which might mean that he was a member of society for a long time.

CHARACTER ✸

HARRY POTTER

"I think everyone has their own image of Harry", my friend said. That's why, he thinks, matching everyone's image will be near impossible. Forgive me if I destory anyone's image!! He's quite tough and cool despite the environment he was raised in, so I imagine him to have a little bit of dark side. Like... maybe it'll be Harry and Sirius in the future. By that time, how old will Sirius be-- (bitter laugh)

HERMIONE GRANGER

I love smart girls-- (laugh) Her determination to learn exceeds measurement, and that's what's good about her. In the latest (Book 3), she has shown her more girl-like side with her crush on Lockheart. It was also cute how the first person to complain about that was Ron, yet those two are both stubborn, so even if they open their eyes, chance of them getting close is next to none. That's nice in its own way though.

RONALDY WEASLEY

Ron is a true man. While he appears to be normal child with many brothers, he's worth noting because he never runs away from danger and always stays by Harry's side. But I think it's because he's Harry's best friend that shapes him into a true man. Although he does have pressure from his older brothers, Ron will most likely grow up in his own distinctive way to be just as good as them.

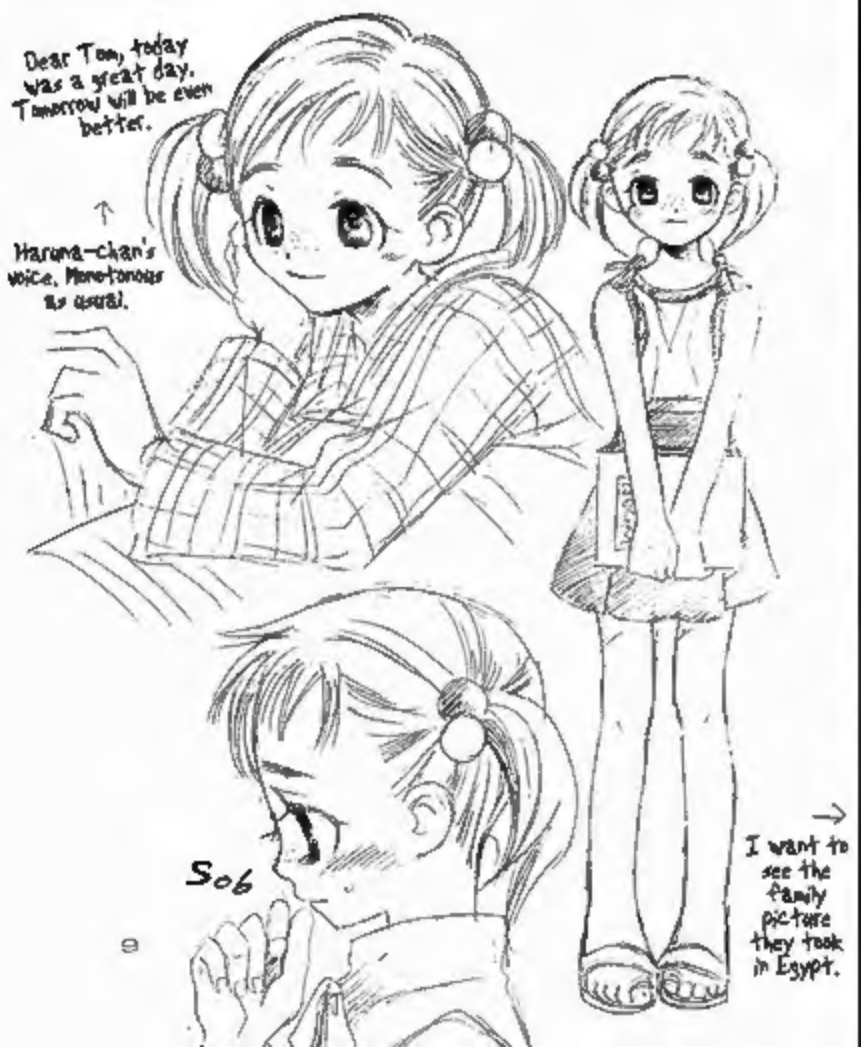
FRED JEORGEY WEASLEY

These two were my favorite character until Sirius came out in the third book. I enjoyed reading about them pranking everyone. Even when they don't seem to be studying much, they set the standards for others, and that's what also makes them like true man, right Brothers? I have fun just thinking, "Were Sirius and James like these two, too?"

CHARACTER

TOM RIDDLE

This guy's split personality, pretending to be goody-goody person when he was a Head Boy or in front of Ginny, and his other, true self, makes him a fascinating character. How he rarely shows his true figure in the Harry Potter's world makes him interesting; I also like his connection with Ginny, like when he thought the business-like smile he use on Dumbledore was lovely, so he wanted to use it for her as well. But then, I guess Ginny was asking to be deceived with that smile of hers.



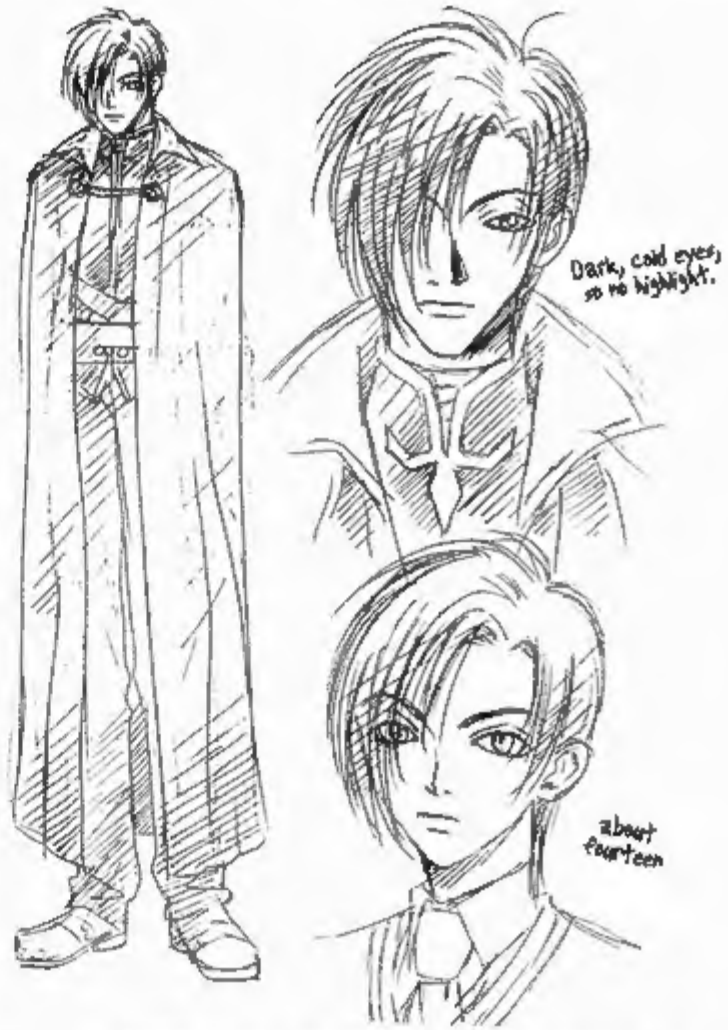
Dear Tom, today was a great day. Tomorrow will be even better.
Haruna-chan's voice, Monotonous as usual.
Sob
I want to see the family picture they took in Egypt.

GINNY WEASLEY

Ginny and Riddle's relation is both cute and charming. She got deceived just shows how much she loves Harry!! That was probably the case, and besides, she's so innocent and pure—. Because she was the only girl in the Weasley family, she must have been pampered by her older brothers and parents. I tend to like photos of the not-too-you-and-not-too-old brothers and little girls, so I would love to see some group photos.

SEVERUS SNAPE

I feel sorry for Professor Snape because he was left to deal with the devastating trauma while James surpassed him in social standing. How he have little success in everything makes me pity and at the same time, like him. I guess his days as students weren't that much different. I can really understand how it must have felt on the receiving end... When I think about how much emotion Snape must have held for James to even aim the dagger at James' son, Harry, it seems to suggest James and Snape pairing, doesn't it? (even if to seek revenge)



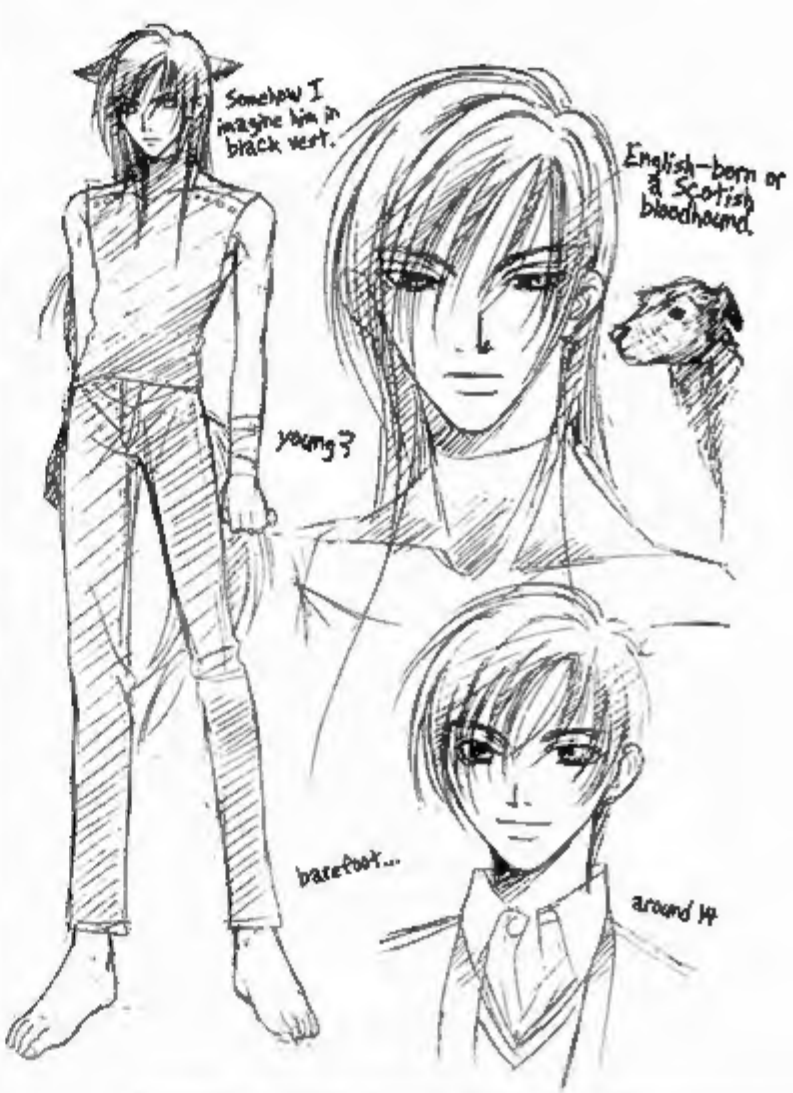
DRACO MALFOY

Although he's a rather unpopular character, it's too cute how he tries to uphold his pure blood family pride, or how he can never beat Harry no matter how much he tries, or how he tease others to spread his power. Silver blonde is another key point. He has already taken a form of a kitten in my head. Awwwww. After watching the movie, my friends and I refer to him as the "princess" (laugh) Princess Draco.

CHARACTER ✸

SIRIUS BLACK

I fell in love with him after reading Book 3... The strength of a determined heart that overcame ten years of imprisonment in the Azkaban or the ability to sense when his friends are in danger must be his strength, but forgive me, that was the one-word, one-shot example proposal (laugh). It's nice to be able to tell Harry about his father. Regardless of why, Sirius is absolutely cool!! Or so I have a strong impression, but when I re-read my favorite proposal scene, it feels rather modest or should I say, his back was too low. He's a really cute person, really. (laugh)



REMUS LUPIN

From his first appearance, by the way they depicted him, I always assumed he was Headmaster Dumbledore's rival... He was like a relative to Harry and actually quite successful professor, so it's a little sad to see him go—. With his personal issues that makes his life complicated, will he be able to find a new job—? I hope they follow up on that in the future.

PERCY WEASLEY

Like Ron, he's the victum of the twin's pranks. It must be a little humiliating, being older. (laugh) I like his hard-working personality. He seems to have gotten well with the brothers who were Head Boys--. On the other hand, how come the rebels like the twins don't admire him? I wonder how old is Percy--? From Book One, he was already a Prefect. Assuming he hasn't graduated yet, does that mean he was a Prefect since his Fourth Year--. I wonder if Hermione will be the one to receive the Prefect badge next year--.

GILDEROY LOCKHEART

I assume you're in your middle age, Professor Lockheart. My impression of him is just in late twenties. Is that too young? Sometimes I like his narcissist personality. The book did mention his physically attractive side other than with Hermione, and that was kind of funny. For a moment, he makes me remember Narcissus. (laugh)

In this way

I became part of a new family.

This takes place in a parallel universe because Harry and Sirius never lived together in the books . . . I really do think that if they lived together, they would be able to replace each other's missing pieces. Is that too idealistic? I wanted to draw a more sensible story about Sirius, but I realized that I can't draw dogs, it's quite tragic . . . the task is too great . . .

I think it would be fun to draw a manga about the school days of James and his friends, and would like to try it sometime. I wonder if James and Sirius were friends from the beginning like Harry and Ron? (I fantasize that they had conflicts with each other in the beginning.) Did they try to become friends with Lupin, or make Snape jealous? I have those sorts of wild ideas about their relationships. (laugh)

Come to think of it, the last genre I did had a connection with England too, so I anxiously waited for data on furniture. While I was doing that, I took a break with "Padfoot"-chan. "Sirius" is derived from "dog star"-not only the outside appearance of the characters is interesting, but other characteristics about them are, too. Once again I marveled at how incredible it is.

Well, this was a short book, but I would be happy to hear any comments about it.
